

Market your practice and organize your work.

MINDBODY helps you get your business in front of more clients, and offer a better overall experience to them, too. Here's how our products work together (all three are included in a software subscription):

MINDBODY software

Keep track of clients and payments.

Think of the software as your hub for the day-to-day tasks at your practice. You can store every client's important information in a simple profile, book their appointments, apply their payments directly to their accounts, and track their visit and payment history over time.

MINDBODY Connect

Get the exposure you deserve.

People in your neighborhood can find you on MINDBODY Connect. With nearly half a million users, the app shows potential clients what you do, when you're available, and how much you charge. They can book directly from the app, and even pay before they arrive.

MINDBODY Exchange

Gain exclusive access to employees.

Employers use MINDBODY Exchange to encourage their employees to live healthier. They offer a monthly stipend to their employees via the MINDBODY Exchange Card—which those employees can only redeem at locations (like yours) on the MINDBODY Exchange network.

Take the tour today. In all, MINDBODY comes with over 100 ways to save time and simplify. To see them all, schedule a guided tour today at
